

Snap Policy Pack — Overview & Action List

Drafted: July 26, 2026 **Status:** Working drafts. Not launch-ready until reviewed by a Saint Lucian attorney.

What's in this pack

#	Document	Priority	Legal review need
01	Cancellation & Refund Policy	Launch-critical	Moderate
02	Creator Agreement	Launch-critical	High — contractor classification, non-circumvention, governing law
03	Trust & Safety Policy	Launch-critical	Moderate
04	Content & Usage Policy	Launch-critical	Moderate — IP ownership language
05	Payment & Payout Policy	Launch-critical	Moderate — tax line needs accountant input
06	Data Retention Policy	Pre-launch	High — retention periods must match Saint Lucian law
07	Minor Safety & Age Policy	Launch-critical	Moderate
08	Dispute Resolution Policy	Pre-launch	Moderate — interaction with T&C forum clause
09	Background Check & Vetting Disclosure	Blocked until provider chosen	High — jurisdiction and provider specific
10	Accessibility Statement	Pre-launch, low effort	Low

Existing (separate, still filler per project doc): Terms of Service, Privacy Policy — both need real drafting and must be reconciled with this pack.

Decisions still open (yours, not the lawyer's)

1. **Raw footage retention window** — drafted as 90 days after completion. This also defines how long clients can order re-edits from a past session. Confirm the number.
2. **Delivered content in-app availability** — drafted as 12 months. Confirm.
3. **Non-circumvention period** (Creator Agreement) — drafted as 12 months. Confirm.
4. **Dispute window** — drafted as 7 days from delivery. Note: this interacts with your 48-72h payout holding window — payouts clear before the dispute window closes, meaning late disputes may require clawback. Either extend the holding window,

shorten the dispute window, or accept the clawback risk. This is a real design decision, not a drafting detail.

5. **Client no-show creator compensation** — drafted as full payout (per our discussion). Confirm.
6. **Background check re-verification cadence** — drafted as every 24 months. Confirm.
7. **Taxes** — whether prices include applicable taxes. Needs accountant, not just attorney.

Product/build implications created by these policies

These drafts assume app features that don't exist yet — add to backend/CD lists:

- **"Session includes children under 18" disclosure toggle** in the booking flow (Minor Safety Policy 2.3)
- **Portfolio/marketing consent capture** flow, per-client, recorded and revocable (Content Policy §2)
- **No-show reporting actions** with 15-min grace timers on both Session Day (client) and creator session flow — matches the no-show policy we agreed
- **Dispute intake** tied to bookings ("Report a Problem" needs a structured dispute path, not just free text)
- **Raw footage auto-deletion** job at the retention deadline + client notification before it
- **Consent versioning** — record which version of each policy/agreement a user accepted and when (needed for Creator Agreement and Background Check Disclosure especially)

Suggested next steps

1. Read through 01, 02, 03, 07 first (the launch-critical set with the most Snapt-specific decisions) and mark anything that doesn't match how you want the product to work.
2. Close the 7 open decisions above.
3. Choose the background check provider — 09 can't be finalized without it.
4. Then send the pack + your existing T&C/PP shells to a Saint Lucian attorney as one package, so governing law, forum, and definitions are consistent across all documents.
