

SnapT — Data Retention Policy

Effective date: [Insert date] **Contact:** hello@snaptcarib.app

This policy explains how long SnapT keeps different categories of data and what happens when retention periods end. It supplements the SnapT Privacy Policy. Where this policy and the Privacy Policy differ, the Privacy Policy controls the *what and why* of collection; this policy controls the *how long*.

DRAFT — retention periods below are proposed defaults and must be confirmed against Saint Lucian legal requirements (tax, financial record-keeping, and data protection law) before adoption.

1. Principles

- We keep personal data only as long as needed for the purpose it was collected, to meet legal obligations, or to resolve disputes.
- When a retention period ends, data is deleted or irreversibly anonymized.
- Backups containing expired data are purged on the backup rotation cycle, within [30–90] days of primary deletion.

2. Retention schedule

Data category	Retention period	Notes
Account profile (name, email, phone, settings)	Life of account + 90 days after deletion request	Grace period allows accidental-deletion recovery
Identity documents (creator vetting)	Duration of creator status + [12] months	Kept only as long as needed to evidence vetting; encrypted at rest, restricted access
Background check results	Pass/fail outcome retained for duration of creator status + [12] months; full report retained only as long as required by the check provider/law	Minimize what is stored; prefer storing outcome only
Raw session footage	[90] days after order completion , then permanently deleted	Client is notified of the deletion window; re-edit orders must be placed within it
Final delivered content	[12] months after delivery in-platform	Clients should download their content; in-app availability is a convenience, not permanent storage
Client-uploaded footage (remote edit orders)	[90] days after order completion	Same as raw footage
In-app chat logs	[24] months from last message	Needed for dispute resolution and safety investigations
Booking and transaction records	[7] years	Financial/tax record-keeping requirement — confirm exact period under Saint Lucian law
Location data (meeting points, live GPS during sessions)	Meeting points: life of booking record. Live GPS traces: [30] days after session	GPS traces kept briefly for safety/dispute purposes only
Ratings and reviews	Life of the rated account	Anonymized if the authoring account is deleted
Strike/reliability records (creators)	Rolling 60-day active window; historical log retained for duration of creator status	Active consequences use the rolling window only
Support tickets and reports	[24] months after closure	Safety-related reports may be kept longer where needed to

Data category	Retention period	Notes
		protect users
Payment card details	Not stored by Snapt	Held by Stripe; we store only tokens and last-4/brand metadata
Marketing consents and preferences	Until withdrawn + proof of consent for [24] months	

3. Account deletion

When you delete your account (Profile → Delete Account) or request deletion at hello@snaptcarib.app:

- Profile data is deleted after the 90-day grace period;
- Content and footage follow the schedule above rather than being deleted immediately, where retention is still required (e.g., an open order or dispute);
- Transaction records are retained for the legally required financial period even after account deletion, in minimized form;
- Data needed for an open dispute, investigation, or legal obligation is retained until that matter concludes, then deleted.

4. Legal holds

Where data is subject to a legal claim, law-enforcement request, or regulatory obligation, the affected data is preserved until the hold is released, notwithstanding the schedule above.

5. Security during retention

Retained data is protected per our security practices: identity and background check documents are encrypted at rest with access restricted to authorized vetting personnel; raw footage is accessible only to the assigned creator/editor and authorized moderation staff, never to clients or other users.

6. Changes

We may update this schedule as legal requirements and platform features evolve. Material changes will be reflected in the app and on this page.
