

SnapT — Background Check & Vetting Disclosure and Consent

Effective date: [Insert date] Contact: hello@snaptcarib.app

DRAFT — REQUIRES LEGAL REVIEW. Background check disclosure and consent requirements are jurisdiction-specific. This document must be reviewed against Saint Lucian law (and the laws of any territory SnapT expands into) and against the chosen background check provider's requirements before use. The provider is not yet selected; bracketed sections depend on that selection.

This disclosure explains what SnapT checks when you apply to become a creator, how the results are used, and what rights you have in the process. You will be asked to consent to this disclosure as part of your creator application. **In-person service applicants only** — applicants offering remote editing services only are subject to identity verification but not a background check.

1. What we verify

All creator applicants (identity verification):

- That your government-issued ID is authentic and matches the identity on your application;
- Your name, date of birth, and that you are at least 18.

In-person service applicants (background check), conducted through [background check provider name]:

- Criminal record check in Saint Lucia [and/or your country of residence — provider-dependent];
- [Sex offender / child protection registry check, where such a registry exists and is lawfully searchable — provider and jurisdiction dependent];
- [Any additional checks the selected provider performs — enumerate exactly once provider is chosen. Do not list checks that are not actually performed.]

We do **not** check: your credit history, your social media, or your medical information.

2. Your consent

By accepting this disclosure in the application flow, you authorize SnapT and its background check provider to perform the checks listed above, and to obtain records from relevant authorities and registries for that purpose. You may decline — in which case your application for in-person services cannot proceed, though you may still apply for remote editing services.

3. How results are used

3.1. Results are used **solely** to decide whether you can be approved for in-person creator services, and for periodic re-verification (Section 6).

3.2. Results are reviewed by authorized Snapt vetting personnel only. Results are never shown to clients — clients see only that a creator has been vetted, never any underlying detail.

3.3. Not every record results in a decline. Findings are assessed for relevance to the safety of in-person sessions with members of the public, considering the nature of any offence, its recency, and its seriousness. Offences involving violence, sexual misconduct, or crimes against children are disqualifying.

4. If your application is declined based on check results

4.1. You will be notified that vetting results affected the decision.

4.2. You may request the substance of the finding relied upon by emailing hello@snaptcarib.app, subject to what the provider and law permit us to share.

4.3. **If you believe the record is inaccurate or belongs to someone else**, tell us within 14 days. We will pause the final decision, ask the provider to re-verify, and correct the outcome if the record was wrong. [Confirm provider's dispute mechanism and integrate exact steps here.]

5. Data handling

- ID documents and check outcomes are stored encrypted, with access restricted to authorized vetting personnel, and retained per the Snapt Data Retention Policy.
- Wherever possible, Snapt stores only the **outcome** of a check (approved / not approved and category of concern), not full report contents. [Confirm what the provider requires/permits.]
- Your check data is never sold, never used for marketing, and never shared with clients or other creators.

6. Re-verification

Approval is not permanent. Snapt may re-run checks periodically [e.g., every 24 months] and following a credible safety report. Continued creator status is conditioned on passing re-verification, and you will be asked to renew consent at that time.

7. Questions

Questions about the vetting process, your data, or a decision: hello@snaptcarib.app

Consent record: acceptance of this disclosure is captured electronically in the creator application flow, with the date, time, and version of this document recorded.
