

SnapT — CD Verification Checklist

Work through this screen by screen. For each item, confirm it matches what was asked, not just that something rendered. Flag anything wrong, missing, or different from intent, then bring those back before we compile the backend doc or start Admin Portal design.

1. Sign up screen

- ☐ Logo mark (icon) is used at the top, not the "SnapT" wordmark text
- ☐ Paper airplane + pale-yellow watermark illustration present, top right, doesn't overlap the back button or any field
- ☐ Three OAuth buttons visible and equal priority: Google, Apple, Facebook (no "More sign up options" dropdown hiding Facebook)
- ☐ Country/Phone field: dial code defaults to Saint Lucia (+1 758), but supports other countries
- ☐ Country/Phone field: shows an actual flag icon (not a globe icon) for the selected country, and flags appear next to each option in the dropdown list
- ☐ A **separate** Country field exists (service-region selector, distinct from phone dial code) — defaults to Saint Lucia, structured so more countries can be added later
- ☐ Consent copy reads exactly: "By continuing, you agree to SnapT's Terms & Privacy Policy."
- ☐ Full name, Email, Password fields and the 3 password validation pills still present and unchanged

2. Login screen

- ☐ Logo mark (icon) used at top, not wordmark text — same asset as sign up
- ☐ Paper airplane + watermark illustration present, top right, matches sign up screen's version exactly
- ☐ Three OAuth buttons: Google, Apple, Facebook — same set/order as sign up screen
- ☐ Email, Password, "Forgot password?", Log in CTA, "New to SnapT? Sign up" footer all unchanged

3. FAB "Start a booking" bottom sheet

- ☐ Category chips (Events, Portraits, Social, Family, Wedding) now show custom emojis
- ☐ Emojis and category order match the Home screen's quick-start form exactly — do a direct side-by-side, they should be identical

4. Cancellation & Reschedule flow

- ☐ "Cancel Booking" and "Reschedule" options present on Booking Detail / Order Tracker screen
- ☐ Cancel confirmation screen correctly calculates and displays the right tier based on time-to-session:
 - ☐ >48hrs → full refund, shown in green

- ☐ 24-48hrs → 50% charge, dollar amount shown
- ☐ <24hrs → 100% charge, no refund, shown in red
- ☐ Policy explanation copy is visible on the cancel confirmation screen, not just the outcome
- ☐ Slide-to-confirm used for the final cancel action
- ☐ Post-cancel confirmation state shown, booking marked "Cancelled" in history
- ☐ Reschedule >48hrs out: free, opens existing Date & Time picker
- ☐ Reschedule 24-48hrs out: shows fee warning interstitial before proceeding to picker
- ☐ Reschedule <6hrs out: disabled, message directs to cancel instead
- ☐ Creator-initiated cancellation: client sees banner/notification, full refund confirmed, option to rematch or start new booking

5. Legal section (Profile → Legal)

- ☐ All 12 documents listed as individual items: Terms of Service, Privacy Policy, Cancellation & Refund Policy, Creator Agreement, Trust & Safety Policy, Content & Usage Policy, Payment & Payout Policy, Data Retention Policy, Minor Safety & Age Policy, Dispute Resolution Policy, Background Check & Vetting Disclosure, Accessibility Statement
- ☐ Each opens to its own screen with title + "Last updated [date]" placeholder line
- ☐ Bracketed placeholder text (e.g., "[Insert date]") is still visibly present, not smoothed over or deleted
- ☐ Creator Application flow includes an explicit Creator Agreement consent checkbox, separate from the background check consent step
- ☐ Background check consent step links directly to the Background Check & Vetting Disclosure document

6. Safety features

- ☐ Safety action visible on Session Day screen **only once session is marked active** (not before check-in, not after session ends)
- ☐ Action opens to: "End session," "Report a safety concern," "Call [emergency number]" — three distinct options
- ☐ "End session" has **no slide-to-confirm, no fee disclosure, no friction** — confirm this explicitly, it's the one place friction would be harmful
- ☐ Emergency Contact field present in Profile → Account
- ☐ "Share my session" action present on active session screen, sends meeting details via SMS-style share
- ☐ "Verified Creator" badge appears on Creator Assignment screen cards
- ☐ "Verified Creator" badge appears on full Creator Profile view

7. Creator specialties (Occasion matching)

- ☐ Specialties multi-select field present in Creator Application flow, required (at least one selection)
- ☐ Same field editable later from Creator Profile/Settings

- ☐ Uses same category set + icons as client-facing "What's the moment?" (Events, Portraits, Social, Family, Wedding)

8. No-show UI

Client side:

- ☐ Grace period countdown/elapsed-time indicator shows on Session Day once scheduled start time passes with no creator check-in
- ☐ "Creator hasn't arrived" action stays disabled during the 15-minute grace window, with a visible countdown label
- ☐ Action enables after 15 minutes
- ☐ Confirmation screen states full refund outcome clearly
- ☐ Slide-to-confirm used for final action
- ☐ Post-confirm: rebook option and no-penalty cancel option both offered
- ☐ "Message support" fallback link present for disputed cases

Creator side:

- ☐ Same grace-period pattern on creator's session screen
 - ☐ "Client hasn't arrived" action requires confirming an attempted chat contact first (checkbox/step)
 - ☐ Confirmation screen states client is charged in full, no refund, and creator still receives standard payout
 - ☐ Slide-to-confirm used for final action
 - ☐ Post-confirm returns creator to schedule/job feed with session marked accordingly
-

9. Carryover items from before this session — re-check these specifically

- ☐ Meeting Point screen: header/search field no longer overlaps the status bar on scroll
 - ☐ Meeting Point screen: Continue button is pinned to the bottom, doesn't require scrolling to reach
 - ☐ Creator avatars: do a dedicated sweep across **all** screens, including the new ones built this session (Legal section doesn't apply, but Creator Assignment, Creator Profile, Featured Creators, Job Feed, and anywhere else a creator photo appears)
 - ☐ "Brand Event" category: confirm it does not reappear anywhere, including the newly rebuilt FAB sheet and Creator Specialties field
-

When you're done

Bring back a list of anything that failed a checkbox above — screen name + what's wrong. I'll turn those into follow-up CD prompts before we move to the backend doc or Admin Portal design.
